Antioxidant SG-R 616

Chemical Name: Phenol,4-methyl-,reaction products with dicyclopentadiene and isobutylene

CAS NO.: 68610-51-5

Product appearance : Flowable milky color powder

Applications:

It has high activity and low volatility, mainly used to protect light colored and color-contamination free compounds (better than 264, 2246). It is also used in polymer processing, especially for the latex products (foamed rubber, impregnated rubber and rubber-filament product), rubber gum product and adhesive. Antioxidant 616 can protect natural and synthetic polymers based on isoprene and butadiene, and also can serve as the highly effective additive to the polyphenol.

Packing: Packed with PE bag or cardboard drum, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
